book insights 1 the act of creation is singular as is the moment of creation and the result is something fresh and strange unless american companies invest in the difficult task of creating new things they will fail in the future 2 the future should be available to everyone not just students in silicon valley

thimblesofplenty is a group of friends who also happen to be business people and avid readers we wanted to keep up with the latest business books but found that time was a factor so we divided out the work and each of us took a book and summarised it for the others we though it might be a great idea to share these summaries with you for a small price and a 3 minute time investment our summary gives you some of the wisdom from the book some food for thought and hopefully the impetus to make some time to read the whole book

summary of zero to one the great mystery of our time is that there are still unexplored areas to discover and new inventions to create it demonstrates how we can find distinctive ways to build those new things it starts with the notion that we live in a time when information technology has advanced rapidly and there is no reason to think that progress should be limited to computers or silicon valley progress is possible in any industry or business sector it stems from the most critical skill any entrepreneur must master the ability to think for oneself disclaimer this is a summary of the book not the original book and contains opinions about the book it is not affiliated in any way with the original author

peter thiel and blake masters explicate what is needed to set up a huge empire they will make you learn how to stand class apart and still be most valuable they will also acquaint you with the elements that make you build a profitable monopoly this is not a book on tips for moneymaking peter thiel and blake masters share hits and errors find out from their experiences what made some companies a huge success or what made some companies fail miserably you will not find any instant shortcuts for success in the pages that follow but you will learn how to build a start up company with tremendous potential to turn into an industry leader zero to one explains you how you can grab an opportunity that knocks your door and utilize it to the fullest ideas you will discover from this book how to anticipate the grade of the business how to gear up for the time to come how to make every situation and location advantageous for yourself how to set up an empire of wealth how to build up and lead a team that loves your business and works for you boundlessly how to stand class apart and still be worthy how to grow from nothing to everything how to acknowledge the opportunities those come your way but you hardly notice about the author ant hive media reads every chapter extracts the understanding and leaves you with a new perspective and time to spare we do the work so you can understand the book in minutes not hours

every moment in business happens only once the next bill gates will not build an operating system the next larry page or sergey brin won t make a search engine and the next mark zuckerberg won t create a social network if you are copying these guys you aren t learning from them it s easier to copy a model than to make something new doing what we already know how to do takes the world from 1 to n adding more of something familiar but every time we create something new we go from 0 to 1 the act of creation is singular as is the moment of creation and the result is something fresh and strange zero to one is about how to build companies that create new things it draws on everything i ve learned directly as a co founder of paypal and palantir and then an investor in hundreds of startups including facebook and spacex the single most powerful pattern i have noticed is that successful people find value in unexpected places and they do this by thinking about business from first principles instead of formulas ask not what would mark do ask what valuable company is nobody building

of course it s easier to copy a model than to make something new doing what we already know how to do takes the world from 1 to n adding more of something familiar but every time we create something new we go from 0 to 1 the act of creation is singular as is the moment of creation and the result is something fresh and strange tomorrow s champions will not win by competing ruthlessly in today s marketplace they will escape competition altogether because their businesses will be unique thiel s argument is that startups that are aiming to have a big impact need to focus on building the first instance of something going from 0 to 1 but it s not just startups thiel also talks about how hp was successful throughout the 1990s by consistently building important new things and that their decline started when they stopped inventing if you are unfamiliar with peter thiel he s known for co founding paypal with max levchin elon musk steve chen reid hoffman and other juggernauts in the tech industry he s also known for launching clarium captial and palantir technologies and was an early stage investor in startups like facebook linkedin and tesla peter s resume alone is a reason enough to read innovation thoughts on zero to one however if peter authored innovation thoughts on zero to one under a pseudonym it would still stand as one of the best books about business creativity entrepreneurship and technology if you are a small startup large company or thinking about taking the leap to create your own business this book provides insight it doesn t matter what industry you align with whether it be jewelry tech finance advertising or education zero to one has relevant advice for you
